49, Survey and Sample Methodology section, bottom		Interpretation of data: note that data should be interpreted with caution. The data set is available for further analysis at www.crrc.am under "Programs and Services". Readers should beware of inferring causality. In all cross-tabulations, the confidence in the representativeness decreases with the number of respondents, and needs to be treated with special caution when the number of respondents is in the low double digits. Additional information about sampling errors and other indicators is available upon request to crrc@crrc.am . Due care: although multiple rounds of review have been undertaken to ensure accuracy, we remain grateful for feedback. Please direct your comments to 52 Abovyan Street, Room 312 or via e-mail crrc@crrc.am .
